WORK EXPERIENCE

Response Planner

Unilever, May 2021 - March 2022

It was responsible for the planning of the supply of the Foods category and it was the point of contact for the Capgemini planning team (third party in charge of the operational functions of the area). As a team, they had to ensure that the plans are implemented and the Working Capital and service level indicators are met . This role plays an important role in crisis resolution regarding the finished product or materials, being fundamental support for the third party.

MRP Specialist

Unilever, June 2019 - April 2021

It was responsible for the purchasing strategy of raw materials and packaging material for the plant, aligned with the established stock policies that support the finished product supply plan, in accordance with the business needs. It was also important the participation, generation and execution of projects to improve Stocks and costs.

Supply Planner

Unilever, December 2018 - May 2019

The main responsability was to assure the supply of finished product for one of the categories of the Foods plant, ensuring the level of service and controlling stock levels. It was also important the support for innovation projects to guarantee their execution at the plant and availability for sale on the scheduled dates. This role had to supervise and support the work of the MRP, who must guarantee the availability of materials in the plant for the execution of production programs.
